

script.tv

Free 24/7 Decentralized Television

Script Network – Explained

With television progressively turning into a cord cutting, digital experience, script.tv are focused on delivering a unique, industry defining experience, using blockchain technology. Although there are multiple options to consume content globally, script.tv is the first to bring live television to blockchain, with on-chain rewards through NFTs, gifts, layered functionality and tokens through our watch to earn model.

Our Mission + Vision

Script Networks vision is to revolutionise the way users consume content, by giving them unrivalled access, opportunity and benefits that no other content platform has been able to provide to date. Beyond that, at scale, Script Networks mission is to build a suite of products within Script Blockchain, enabling dApps, partnerships and APIs to enhance the viewing experience for the user. Script Network is fixing a broken model in the production industry of launch, distribution, promotion that content houses have had for decades.

Script Network Highlights

- Multi functional – live chat, private message and trade NFTs for that show/film in real time.
- Fully functional 24/7 live television platform.
- Two tokens – Governance (\$SCPT) and Utility (\$SPAY) – to bring fair consensus, scale and long term reward opportunities.
- Self-fulfilling business model – 3 core revenue streams.
- Built to scale on its own Blockchain (Script).
- Multi level reward model – content partners, advertisers, viewers and lightning nodes all can earn passive income daily.

Current Market Issues

- ❌ No live TV platforms that allow full interaction with other users.
- ❌ No protocol to pay users for their value to the content ecosystem.
- ❌ No clean, decentralised process for content partners to distribute and scale their content quickly.
- ❌ No value add or benefit for users using any content platform.
- ❌ No blockchain based TV platforms

Token Benefits

Own:

Through owning \$SCPT tokens, you have ownership over larger production projects Script develops including tv series, films and NFT collections.

Staking:

Stake your \$SCPT tokens, earn \$SPAY tokens.

Script Network Solutions

- ✅ Full interaction for users and content partners.
- ✅ A complete ecosystem for television and film on blockchain.
- ✅ On own network, and blockchain to maximise scale and security.
- ✅ Users can earn by viewing content, or by being a node on the Script Network.
- ✅ Multi accessible network for content based NFTs and projects to build, and distribute through Script Network.

Tradeable:

Trade your \$SPAY tokens for real world products such as festivals, events and cinema tickets through our Script Swap model.

Governance:

Have voting power on the future of parts of the network through our voting mechanism.
